RECORDRADAR

ZIP CODE RADIUS SEARCH

RecordRadar allows you to find all your constituents within a specified radius of a zip code. Simply specify the zip code you wish to search within and the desired radius for your search. Click the search button and RecordRadar will find all the constituents in your database within the specified parameters. RecordRadar generates a query of the results that your organization can continue to use and modify. Configuration allows users to customize the address types and record types.

INSTANT RESULTS
Understand and analyze
constituents by geographical area.

SPECIFY SEARCHES
Enter your constituent
types and more to easily
find exactly what you need.

IDENTIFY TOP PROSPECTS
Search specific areas and
identify ideal donors for
your major gift officer's trip.

STATIC QUERY
Automatically create within
particular parameters.
