

RETRACE

KEEP TRACK OF CHANGES IN RAISER'S EDGE

Raiser's Edge is great at telling us information about the very first and very last changes to a record, but it forgets everything in between. Ever wonder *who* added that odd constituency code to all of your org records? Not sure if you accidentally saved unwanted changes? We know these frustrations make what should be a routine task become a hassle. To help, we've created Retrace.

TRACK CHANGES

Keep track of additions, deletions, and updates across records in Raiser's Edge.

ZOOM IN ON RECORDS

Review your database with intuitive search filters.

FIX ERRORS WITH EASE

Reverse unwanted changes & correct mistakes.

PREVENT FUTURE ERRORS

Identify data entry patterns by source to eliminate the instance of errors.
